

CREATION SCIENCE ASSOCIATION OF ALBERTA

BOOK AND DVD CATALOGUE 2016-17

About our Book and DVD Service

The Creation Science Association of Alberta provides this selection of books and DVDs for sale as a service to those interested in learning more about creation science. This service is brought to you through the volunteer work of our members.

How to Order

Send order by mail using the order form at the back of the catalogue. Optionally you may phone and leave a voice message, or email your order.

Children's Books

A is for Adam

Ken and Mally Ham

\$15.00

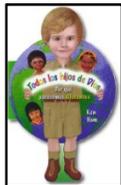

Full colour pictures and rhyming text is used to depict events in the history of salvation. The rhymes proceed through the alphabet. Alternate pages provide discussion starters for parents. Recommended for pre-school to grade one children. *Hardcover, 80 pages, coil with full colour drawings.*

All God's Children: Why We Look Different

Ken Ham

\$5.00

Hardcover, 10 pages, board book, full colour.

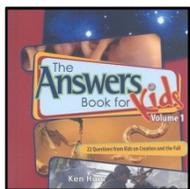

This small board book, cut in the shape of children, features youngsters from around the world. Their message is that differences in appearance and language came about after Babel, and we really are all brothers and sisters. *Hardcover, 10 pages, board book, full colour.*

Answers Book for Kids: Volume 1

Ken Ham

\$8.00

Topic: Creation and the Fall

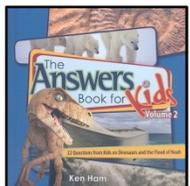

This colourful little book with easy to read format provides children 6 - 12 years old with answers to important questions. (Available in English or Spanish). *Hardcover, 48 pages, full colour.*

Answers Book for Kids: Volume 2

Ken Ham

\$8.00

Topic: Dinosaurs and the Flood of Noah

Hardcover, 48 pages, full colour.

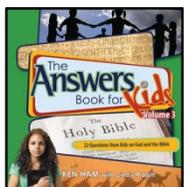

This colourful little book, as with its companion book Answers Book for Kids Volume 1, is written in an easy to read format and provides children 6 - 12 years old with answers to important questions. *Hardcover, 48 pages, full colour.*

Answers Book for Kids: Volume 3

Ham, Ken

\$8.00

Topic: God and the Bible

Hardcover, 48 pages, full colour.

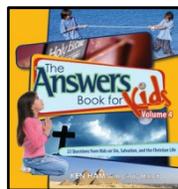

Children aged 4 - 12 ask questions concerning God and the Bible, which the author answers in a friendly and age appropriate style. The full colour illustrations serve to make the readers comfortable and interested in the discussion. *Hardcover, 48 pages, full colour.*

Answers Book for Kids: Volume 4

Ham, Ken

\$8.00

Topic: Sin, Salvation and the Christian Life.

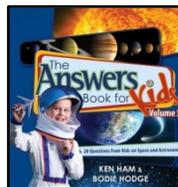

Children aged 6 - 12 ask questions which the author answers in a friendly and age appropriate manner. The full colour illustrations with each topic beautifully enhance the discussion. *Hardcover, 48 pages, full colour.*

Answers Book for Kids: Volume 5

Ken Ham and Bodie Hodge

\$8.00

Topic: Space and Astronomy

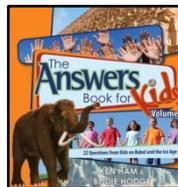

Each 2 page spread features a question asked by a child, a relevant Bible verse and an interesting 2 or 3 paragraph answer. Many aspects of space are discussed. At the end of the booklet, tables of yearly meteor shower dates and of planets and dwarf planets are included as well as definitions of difficult words. *Hardcover, 48 pages, full colour.*

Answers Book for Kids: Volume 6

Ken Ham and Bodie Hodge

\$8.00

Topic: Babel and the Ice Age

Each 2 page spread features a question asked by a child, a relevant Bible verse and an interesting 2 or 3 paragraph answer. The answers deal with Babel and its tower, where various nationalities came from, and the cause and length of the ice age. *Hardcover, 48 pages, full colour.*

Big Book of Earth and Sky

Craig Froman with Bodie Hodge and Carolyn Reeves \$20.00

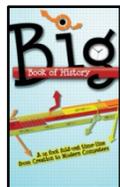

Full colour panels unfold to 15 feet. These panels describe earth's crust, caves, clouds, mountains and weather, all from a Biblical perspective. (Similar in style to the Big Book of History.) *Hardcover, full colour.*

The Big Book of History

Laura Welch, Ken Ham and Bodie Hodge

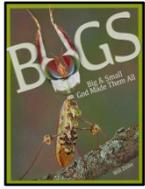

\$20.00

A 5 metre fold-out time-line from creation to modern computers. Recommended for ages 7 - 12. It is easy to see who the contemporaries were at any time in the sweep of human history. *Hardcover, 0 pages, full colour.*

Bugs: Big and Small God Made Them All

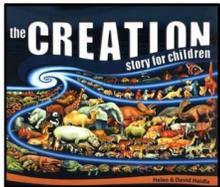

Will Zinke \$15.00

Unique design features of various intriguing and beautiful insects point to the work of God, the Creator. Amazing photography! *Hardcover, 80 pages, full colour.*

Creation Story for Children

Helen Haidle, David Haidle and Cheri Bladholm \$15.00

The authors focus on the grandeur of God's designs as per Genesis 1-2 and Psalm 139. Full colour illustrations highlight twenty unique creatures which are certain to attract the interest of young children

in God's work in creation. *Hardcover, 40 pages, full colour.*

Creatures of the Boreal Forest

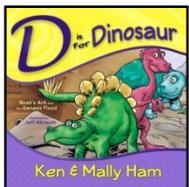

Tammie Burak \$12.00

This activity book provides hands on activities in nature, arithmetic calculations, word games, Scripture study and more. Four creatures of the boreal forest are featured. Highly recommended for families with children in grades 3 - 6 who are either in homeschool or classroom situations. *Paperback, 76 pages, black and white.*

D is for Dinosaur

Ken and Mally Ham \$15.00

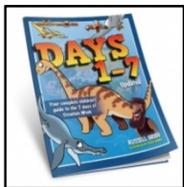

This is a two-part book. The first half features rhymes based on the letters of the alphabet paired together with funny drawings of dinosaurs. Alternate pages provide discussion starters for parents. Recommended for pre-school

to grade one-age children. *Hardcover, 123 pages, full colour drawings.*

Days 1 - 7

Russell Grigg \$3.00

With text and illustrations, this book provides a guide to what God did on each day of the Creation Week. This booklet provides children aged 10-13 with some important issues connected to the days of creation. Boxed

highlights for discussion and suggested activities serve to focus the readers' interest. Fun and interesting. *Paperback, 29 pages, full colour.*

Dinosaurs for Kids

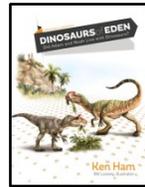

Ken Ham \$12.00

Within these pages kids will uncover the facts about dinosaur history from the Creation to recent discoveries. From where dinosaurs lived to what scientists assume they know about these great creatures, dinosaurs have never been this exciting, revealing and simply amazing! *Hardcover, 64 pages, full colour.*

Dinosaurs of Eden (New Edition)

Ken Ham \$15.00

This completely revised edition of a popular book for young children, features new illustrations and text concerning dinosaurs in the Garden of Eden and in the wider world prior to Noah's flood. Even in the post-flood world some dinosaurs no

doubt survived and these are included in the text and illustrations. *Hardcover, 64 pages, full colour.*

Dinosaurs Unleashed

Kyle Butt and Eric Lyons \$15.00

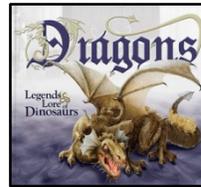

Illustrated throughout in vibrant colour by Alberta's famous artist, Lewis Lavoie, this book answers in upbeat fashion, all the popular questions concerning dinosaurs. It also discusses other similar extinct animals like the fearsome flying reptiles

and swimming reptiles. Many famous dinosaurs are illustrated and individually discussed. This book, which places these creatures in a Biblical/historical context, is written for grades three to seven. The exceptional artwork however appeals to all ages. *Hardcover, 80 pages, full colour drawings.*

Dragons of Legend and Lore

Bodie Hodge and Laura Welch (editors) \$15.00

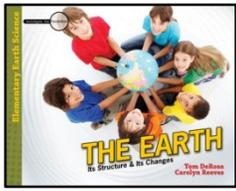

This interactive book appeals to all ages. The illustrations are fun and the discussion very informative. This is your opportunity to explore the links between dragon myths and the reality of dinosaurs. *Hardcover, 23*

pages, full colour.

The Earth: Its Structure and Changes

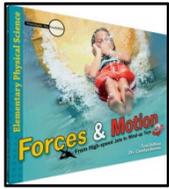

Tom DeRosa and Carolyn Reeves \$12.00

With hands-on experiments and beautiful photographs and diagrams, children are introduced to interesting aspects of our globe: its shape, magnetic field, rocks, earthquakes, glaciers, volcanoes, minerals, fossil fuels and the like. An excellent introduction to investigative learning! *Paperback, 88 pages, full colour.*

Forces and Motion

Tom DeRosa and Carolyn Reeves \$12.00

From High-speed Jets to Wind-up Toys. Excellent for grades 3 to 6 students, this book presents 20 exciting hands-on activities that will ignite curiosity about the wonderful world God has made. Investigate many physical science concepts through activities that you can do at home! A great book to enjoy with any young scientist! *Paperback, 88 pages, full colour.*

Life in the Great Ice Age

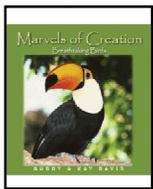

Michael and Beverly Oard \$15.00

A story brings to life what it must have been like in the unsettled climate after the Flood. Part two explains scientific causes for the Ice Age. Archaeological and fossil finds of the time are also illustrated and discussed. Recommended for grades five to seven. *Hardcover, 72 pages, full colour drawings.*

Marvels of Creation: Breathtaking Birds

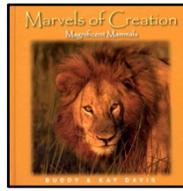

Buddy & Kay Davis \$14.00

Back by popular demand, these little books devote two pages to each highlighted creature. On one page we find a beautiful photograph and on the other, details about the characteristics and lifestyle of the creature. Young children love to identify these animals and to hear about what the animals are like. *Hardcover, 80 pages, full colour.*

Marvels of Creation: Magnificent Mammals

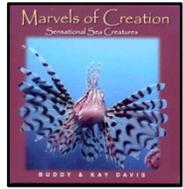

Buddy & Kay Davis \$14.00

Back by popular demand, these little books devote two pages to each highlighted creature. On one page we find a beautiful photograph and on the other, details about the characteristics and lifestyle of this creature. Young children love to identify these animals and hear about what the animals are like. *Hardcover, 80 pages, Full colour.*

Marvels of Creation: Sensational Sea Creatures

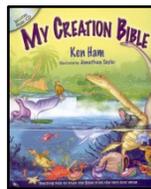

Buddy & Kay Davis \$14.00

Back by popular demand, these little books devote two pages to each highlighted creature. On one page we find a beautiful photograph and on the other, details about the characteristics and lifestyle of this creature. Young children love to identify these animals and hear about what the animals are like. *Hardcover, 80 pages, Full colour.*

My Creation Bible

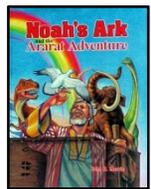

Ken Ham \$10.00

Very young children will love the thick cardboard pages, the full colour drawings and rhyming text plus the free musical CD which introduce the story of creation, the fall of man and God's plan of salvation. Cardboard plus hard plastic handle for carrying. *Hardcover, 26 pages, full colour.*

Noah's Ark and the Ararat Adventure

John D. Morris \$15.00

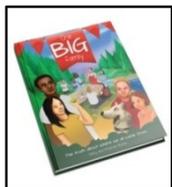

This is a revised, updated and enlarged replacement for the earlier title Noah's Ark and the Lost World. This book contains the latest information concerning the Ark and its possible location on Mount Ararat. Recommended for ages 8 - 12. *Hardcover, 64 pages, full colour photographs.*

One Big Family

Gary and Francis Bates

\$8.00

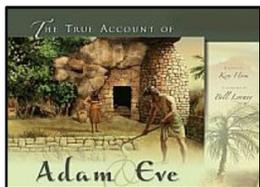

This book looks like a simple introduction for young children concerning the close relationship of people from around the world, in that we are all descendants of Adam and Eve.

The message however comes in many layers. The illustrations themselves are designed to elicit discussion. Also there are Bible references, and footnotes. The footnotes reference more in-depth articles available on the CMI website, which in turn recommend other articles at various levels of readership interest. With one book, apparently written for children, one can proceed to more detailed discussions if desired. *Hardcover, 47 pages, full colour.*

The True Account of Adam and Eve

Ken Ham and Bill Looney

\$15.00

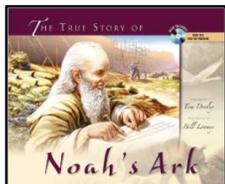

Families will love this beautifully illustrated description of the events of the early chapters of Genesis and their significance.

This book is a timely response among Christians over the validity of Genesis as actual history. Perfect for children and parents to build a biblical foundation. *Hardcover, 56 pages, full colour.*

The True Story of Noah's Ark

Tom Dooley

\$15.00

Based on the account recorded in Genesis 6 - 9 in the Bible, the narrative is true to the biblical record and its timeline of events concerning Noah and the Great Flood. *Hardcover, 73 pages, full*

color.

Wilberforce: An Activity Book

Andrew Edwards and Fleur Thornton

\$3.00

Upper elementary age children will enjoy the information and activities provided in two-page spreads. Each features an account of part of William Wilberforce's life, with a related puzzle or word based activity on the second page. What better way to introduce youngsters to the importance of history and concern for one's fellow man? If the story is read aloud by an adult, somewhat younger children can do the puzzles. A fun learning opportunity! *Paperback, 32 pages, black and white.*

Introductory Level Books

Apologetics in Action - Curriculum Set

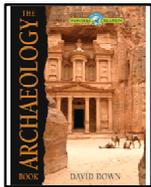

Master Books Curriculum \$72.00

This 5 book set is recommended for upper junior high or high school. It includes volumes one and two of How Do We Know the Bible is True? Edited by Ken Ham and Bodie Hodge. Also volumes one and two of Demolishing Contradictions (Ken Ham and Bodie Hodge), plus a curriculum guide. *Paperback.*

The Archaeology Book

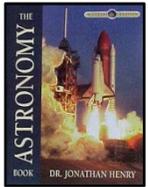

David Down \$16.00

Beautifully illustrated, this book is sure to delight students who are excited by ancient ruins or even those who are not yet familiar with the topic. The ancient remains which are discussed shed light on many biblical events. The book provides information aimed at three reading levels: grades 5 - 6; grades 7 - 8; and grades 9 - 11, but the illustrations speak to all levels of interest. A wonderful introduction to a fascinating subject. *Hardcover, 96 pages, full colour.*

The Astronomy Book

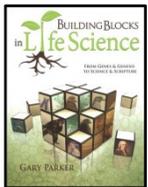

Jonathan Henry \$16.00

A spectacular introduction to astronomy for the junior high student. Everything from planets to supernovas is discussed in a young universe context. *Hardcover, 80 pages, full colour illustrations.*

Building Blocks in Life Science

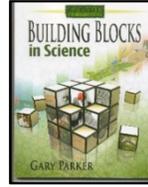

Gary Parker \$12.00

Do genes, chromosomes and DNA seem way beyond your interests? The author not only makes them interesting and understandable, but he also places the details in the context of Scripture. Besides adults new to these topics, the book provides excellent supplemental discussion for students studying these issues. *Paperback, 158 pages, black and white line drawings.*

Building Blocks of Science

Gary Parker \$12.00

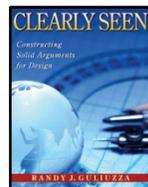

This new book, in the same format as the "Exploring" series, introduces young people at the junior high level, to dinosaur, other reptile, bird and human fossils. The impact of the fall and the flood are important components of the discussion. Chapters include questions (with answers at the back of the book). Very nice. *Paperback, 160 pages, black & white illustrations.*

Clearly Seen: Constructing Solid Arguments for Design

Randy J. Guliuzza \$8.00

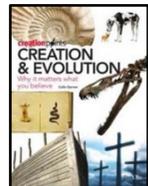

Constructing Solid Arguments for Design

The author demonstrates why the idea of design is so important to a Christian worldview. Evolutionists of course deny that anything was designed, because otherwise a designer would be required. The author uses engineering concepts and other arguments to show that the key features of organisms did not just appear, but they were carefully chosen to fill a need. Recommended for high school and adult readers. *Paperback, 63 pages, full colour.*

Creation & Evolution: Why It Matters What You Believe

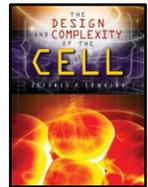

Colin Garner \$5.00

After a brief introduction to the scientific flaws in evolutionary theory, the author shows the importance of creation to Biblical doctrine and how all this affects morality and evangelism. *Paperback, 31 pages, full colour.*

The Design and Complexity of the Cell

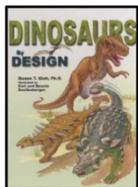

Jeffery P. Tomkins \$15.00

In The Design and Complexity of the Cell, Dr. Jeffrey Tomkins and his contributing colleagues document and help explain the intricate processes of cells, and give keen insight for (clearly seeing) the obvious hand of the Creator in the "things that are made" (Romans 1:20). *Hardcover, 129 pages, full colour.*

Dinosaurs by Design

Duane T. Gish \$18.00

Divided into three sections: a discussion of dinosaur fossils in general, where and when they lived, early fossil discoveries and how to excavate such specimens. Secondly, specific details about many popular dinosaur species: their size, location of fossils and other interesting facts. The last section includes discussions of these creatures in the context of Biblical revelation. For youngsters aged 8 - 14. *Hardcover, 88 pages, full colour drawings.*

Discovery of Design

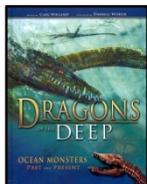

Donald DeYoung and Derrik Hobbs \$15.00

Ideal for upper elementary and junior high readers (as well as any adults interested in fascinating insights), this book briefly describes features of living things which could potentially be copied by inventors today. A 2-page spread describes how specific organisms with interesting characteristics, can inspire our inventions. Three interesting questions are provided with each topic. These discussion starters go beyond the material provided. The answers are provided at the end of the book. A delightful way to expand one's appreciation of creation! *Paperback, 233 pages, black and white.*

Dragons of the Deep

Carl Wieland \$15.00

For too long we have concentrated on scary land based creatures. Those in the sea were more scary! (And more interesting). This book puts ocean monsters past and present into context: size, time, and significance. Interesting for all ages from junior high up. Beautifully illustrated. *Hardcover, 77 pages, full colour.*

The Ecology Book

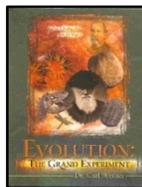

Tom Hennigan and Jean Lightner \$16.00

A new title in the Wonders of Creation series, this book considers mainly different examples of cooperation between unlike organisms such as fungus and alga (to form a lichen), or a vascular plant and a fungus (mycorrhizas). This discussion will encourage young people to look at nature with new appreciation and informed eyes. *Hardcover, 92 pages, full colour.*

Evolution: The Grand Experiment

Dr. Carl Werner \$24.00

Many shortcomings of the fossil record for evolution are beautifully demonstrated with diagrams, charts, photographs and other illustrations. This full colour hard cover book presents its argument in a way that is easily grasped without a lot of reading of complex ideas. Recommended for junior high and high school levels. *Hardcover, 262 pages, full colour.* (Teacher's Guide available for \$14.00).

Exploring Planet Earth

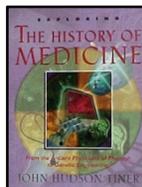

John Tiner \$12.00

Another fascinating book for junior high readers. Following in the footsteps of early explorers, we look at interesting features of our globe such as wind, currents in the sea, the tides, earth's magnetic field, rocks, glaciers, and river systems. Later we move to the atmosphere and exploration by hot air balloon, airplanes and space vehicles. Thought provoking questions at the end of each chapter make this book suitable for geography and social studies (history). *Paperback, 163 pages, line drawings.*

Exploring the History of Medicine

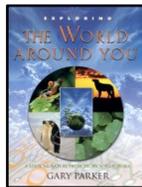

John Tiner \$12.00

This is a high quality book for junior high readers. It traces the history of medicine in a most interesting manner. The emphasis is on asking questions and carrying out direct observations. Questions at the end of each chapter make this book very suitable for social studies or life science classes as well as a fascinating read. *Paperback, 160 pages, line drawings.*

Exploring The World Around You

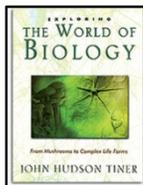

Gary Parker \$12.00

In very readable fashion, Dr. Parker conducts the reader through ecology and environmental science. Where there are differences of interpretation compared with secular, evolution-based discussions of a topic, he points out these issues. Like the other titles in the "Exploring" series, this book comes with end of chapter questions. *Paperback, 140 pages, line drawings.*

Exploring the World of Biology

John Hudson Tiner \$12.00

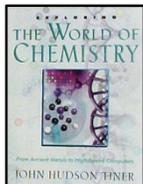

The author introduces young readers (about grades 5 - 7) to topics of biological interest to them. The list includes molds, microbes, plants, some animal groups and some human biology. The approach is upbeat and encourages further research.

Paperback, 153 pages, black and white.

Exploring the World of Chemistry

John Tiner \$12.00

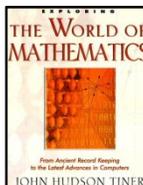

This book combines interesting accounts of chemists' lives with discussion of their discoveries including atomic theory and the table of elements. The logic of organic chemistry is also demonstrated and some modern industrial applications of chemistry are touched upon. Questions conclude each chapter.

Paperback, 142 pages, line drawings.

Exploring The World of Mathematics

John Tiner \$12.00

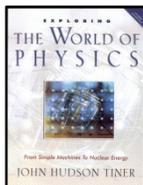

This book highlights the history of math with lots of super-interesting stories and fun math teasers. The discussion, which never gets tedious or dull, runs the gamut from the abacus to the microchip. For ages 12 and up.

Paperback, 160 pages, line drawings.

Exploring the World of Physics

John Hudson Tiner \$12.00

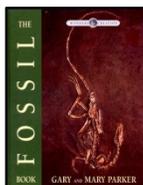

This is another title in the successful "Exploring" series written for junior high readers. The book features the same sorts of illustrations with the questions at the end of each chapter and answers at the back of the book. This is a user

friendly book for readers who want to understand the basics of this topic, not the fancy details of quantum physics. *Paperback, 158 pages, line drawings.*

The Fossil Book

Gary and Mary Parker \$16.00

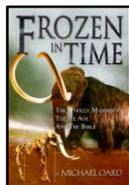

This lovely full colour book provides an introduction to the various groups of fossils. Learn how the Flood affected fossil formation, how to interpret the geological column, and about the formation of coal and oil. This book has a

glossary and index which make it very user friendly. *Hardcover, 80 pages, full colour.*

Frozen In Time

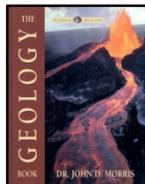

Michael Oard \$12.00

The author gives plausible explanations of the seemingly unsolvable mysteries about the ice age and the woolly mammoths in this intriguing book. Many other ice age topics are explained too including huge ice age floods, ice cores, man in the ice age, and the number of ice ages. *Paperback, 176 pages.*

Geology Book, The

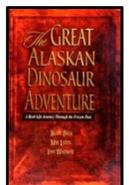

John Morris \$16.00

A wonderful book, written for junior high. The author takes the reader on a tour of the earth's crust, pointing out both the natural beauty and scientific evidences for creation. A definite must for students studying earth science. *Hardcover, 80 pages, full colour illustrations.*

Great Alaskan Dinosaur Adventure

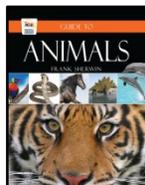

Buddy Davis, Mike Liston and John Whitmore \$10.00

The reader enjoys second hand the real life experiences of five men who journeyed to the Liscombe Dinosaur Bone Bed on Alaska's north shore. The account, partly travelogue, and partly devotional, describes how the men found both fossilized and unfossilized duckbill dinosaur bones. *Paperback, 137 pages, black & white photos.*

Guide to Animals

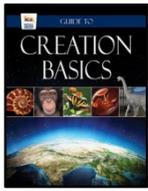

Frank Sherwin \$16.00

This excellent book is certain to change children who do not like "science" into eager learners. Animals are first introduced according to the order of their creation (day 5 or day 6). Next animals with similar designs are presented and finally we find answers to questions such as how they breathe, fly, hibernate or survive extreme climates. Lavishly illustrated. Guaranteed exciting! *Hardcover, 115 pages, full colour.*

Guide to Creation Basics

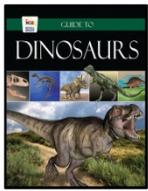

ICR Scientists \$16.00

Aimed at everyone, but specifically upper elementary and lower junior high grades, this book provides a quick but richly illustrated overview of creation. Thus we find earth sciences, physical sciences, the life sciences, myths and fallacies connected Darwinism, and the foundation to creation. Guaranteed to excite interest. *Hardcover, 117 pages, full colour.*

Guide to Dinosaurs

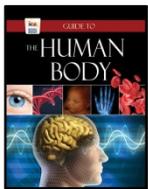

Institute for Creation Research \$16.00

This new "Guide to ..." Book continues the tradition of presenting beautifully illustrated introductions to topics of interest to young readers. Like the other titles in this series, this one presents richly illustrated 2-page spreads which answer many questions about dinosaurs. The answers highlight the relationship of these creatures to the creation and the flood. The discussion is organized into three categories: dinosaur beginnings and history; dinosaur fossils and discoveries; and dinosaur kinds. This book is very appealing to upper elementary age students and everyone else, of course. *Hardcover, 117 pages, full colour.*

Guide to the Human Body

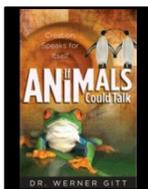

Randy J. Guliuzza \$16.00

This new book in the popular "guide to" series, delves into the complicated construction of the living cell, into a baby's development in the womb, the mechanics of our hands and the incredible abilities of our brain. Other interesting topics like genetics and medical ethics are included. *Hardcover, 120 pages, Full colour.*

If Animals Could Talk

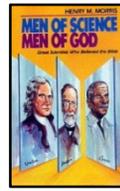

Werner Gitt \$5.00

Translated by Allan Collitster and Mark Garvey. This book about wonderful design features in certain animals, has always been popular. However the animals themselves talk, in this new translation, in language certain to carry along the interest of young listeners. Animals discussed include whales, glowworms, earthworms, and other fascinating creatures. *Paperback, 113 pages, line drawings.*

Men of Science, Men of God

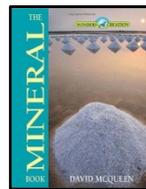

Henry Morris \$8.00

This book presents brief biographies of some key scientists of the past who sought to learn more about God by studying His Creation. Recommended for ages 10 - 14. *Paperback, 107 pages, line drawings.*

The Mineral Book

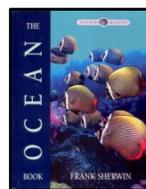

David McQueen \$16.00

This is another title in the popular Wonders of Creation Series. It turns out that minerals are a very interesting part of the Creation. They are beautiful, very useful and many were mentioned in the Bible, which adds to our interest. We learn what minerals are, how to identify them, how to start a collection and their importance to our technological society. Beautiful illustrations. Suitable for all ages. *Hardcover, 94 pages, full colour.*

The Ocean Book

Frank Sherwin \$16.00

A spectacular introduction to the physics and biology of the deep oceans. This new title is in the popular Wonderful Creation series. Like the others, this book is ideal for junior high readers who are curious about something new. *Hardcover, 80 pages, full colour.*

Our Created Moon

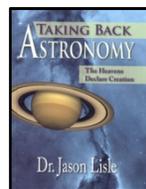

Donald DeYoung and John Whitcomb \$15.00

Filled with beautiful colour images and graphs, this book demonstrates how the features of the moon are not only interesting, but they testify to the moon's recent creation. *Hardcover, 96 pages, full colour.*

Taking Back Astronomy

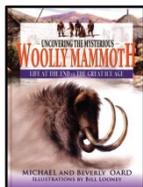

Dr. Jason Lisle \$16.00

The author shows that the popular idea of billions of years is unnecessary and that one need only look to the Creator to explain the origin of the universe. Filled with fascinating photographs and illustrations for easy comprehension. *Hardcover, 125 pages, full colour.*

Uncovering the Woolly Mammoth

Michael and Beverly Oard \$15.00

Christians often wonder about where and when there was an ice age. This book answers these questions in story form relevant to young people. Follow the story of an ice age tribe from Northern Siberia who overcame multiple weather-related disasters. Discover at the same time the science behind the ice age world and how people survive these conditions while the woolly mammoths did not. Written for junior high and older readers. *Hardcover, 65 pages, full colour.*

Untold Secrets of Planet Earth: Amazon Expedition

Vance Nelson \$17.00

This book documents the actual journey, study and validation of an ancient depiction of what appears to be a sauropod dinosaur surrounded by nine hunters. Come on an exciting adventure to the Amazon in Peru, and see new evidence that suggests dinosaurs have lived recently. *Paperback, 43 pages, full colour.*

Untold Secrets of Planet Earth: Dire Dragons

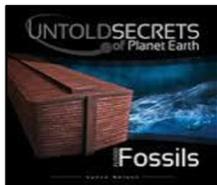

Vance Nelson \$30.00

This deluxe new book features ancient artwork from around the world. The depictions of specific dinosaurs in these artifacts are significant because they suggest that the artists were familiar with such animals and were illustrating what they had observed. *Hardcover, 137 pages, full colour.*

Untold Secrets of Planet Earth: Flood Fossils

Vance Nelson \$30.00

Fossils amaze and delight. But do we really understand their origin? Most early scientists suggested a different origin for fossils than we currently teach. Is it possible, that in the 21st century, we could have made a mistake? A close look at the fossils and the layers in which they are contained, demonstrates one thing for sure. Fossils formed quickly, not slowly. *Fast Fossils* provides photographic examples of fossils from around the world. New evidence may force fossil experts to resort back to one of the earliest ideas of how fossils may have formed. If you have any interest whatsoever in natural history, this book is a must-read. *Hardcover, 195 pages, full colour.*

The Weather Book

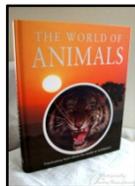

Michael Oard \$17.00

Richly illustrated, this book introduces junior high readers to normal and extreme weather systems, and events of the past such as the worldwide flood of Noah. Interesting and useful for today's young weather observers. *Hardcover, 80 pages, full colour illustrations.*

The World of Animals

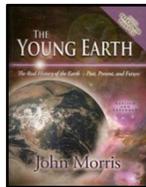

Martin Walters and Jinny Johnson \$20.00

This beautiful new book describes the anatomy, behaviour and habitats of over 1000 animals. There is information on endangered species and environments, obscure facts and animal records. A wonderful introduction to the beauty of creation. Who knew there were so many kinds of animals? *Hardcover, 256 pages, full colour.*

The Young Earth

John Morris \$14.00

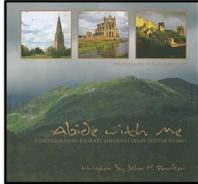

Much different from the previous edition, this new edition features considerable recent research, and a friendly style of writing. Excellent full colour illustrations contribute to a discussion that is interesting to the junior high level and up. *Hardcover, 144 pages, full colour.*

Intermediate Level Books

Abide With Me

John H. Parker

\$13.00

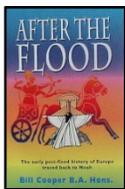

This exciting travelogue, with first hand descriptions and beautiful photographs, presents the stories behind many beloved British hymns. Find out not only who the writers were, but when and why they made their inspiring contributions. Recommended for most ages. Includes free CD. *Hardcover, 112 pages, full colour.*

After the Flood

Bill Cooper

\$12.00

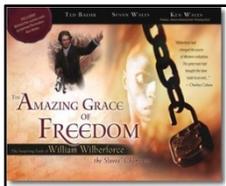

As a result of his examination of ancient European accounts and a table of nations, the author contends that European history can be traced through the descendants of Japheth back to the flood. As a preface to this discussion he also examines the attitudes of the ancients to the issue of origins. *Paperback, 256 pages.*

Amazing Grace of Freedom

Ted Bacher, Susan and Ken Wales

\$15.00

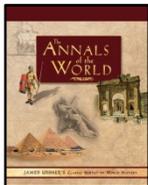

Richly illustrated, this book is part history and part personal account about the making of the film "Amaziing Grace". This book celebrates the efforts of William Wilberforce, who worked tirelessly to bring about the abolition of the Slave Trade in the British Empire. 2007 was the 200th anniversary of the abolition of the slave trade, but a bill for actual freedom did not pass the British parliament until 1833. It was Wilberforce's Christian ideals which led him to change the course of history. Read the book for itself or to supplement the film. In either case, history comes alive. *Hardcover, 140 pages, full colour.*

Annals of the World

James Ussher

\$30.00

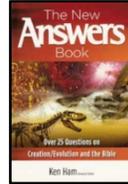

Eminent Old Testament scholar James Ussher of Ireland, in the seventeenth century, compiled an account of the history of the world from the creation to the end of the first century AD. He included significant events from the pagan world which happened at the same time. Thus he provides the reader with a panoramic view of ancient history. *Paperback, 960 pages.*

The New Answers Book 1

Ken Ham (editor)

\$10.00

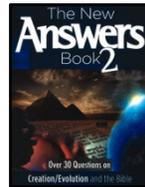

Fifteen experts answer important scientific and Biblical questions about the creation and early history. Light hearted, but clear, illustrations accompany most discussions. Answers on even technical topics are interesting and understandable. An excellent resource. *Paperback, 378 pages, line drawings.*

The New Answers Book 2

Ken Ham (editor)

\$10.00

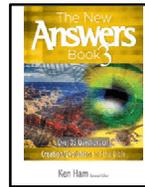

Various experts address many new questions which involve science and faith. Among the topics are astronomy, a Biblical worldview, relationship of apes to man, the Christmas star, Old Testament geneologies, significance of Babel, and the like. *Paperback, 374 pages, black and white.*

The New Answers Book 3

Ken Ham (editor)

\$10.00

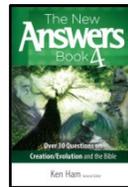

This new volume considers some very interesting and recent issues such as human and chimp DNA, global warming, the created kinds, best evidences for the flood, cloning and stem cells, and location of the Garden of Eden etc. As usual qualified authors have written each chapter in terms that are readily understood. A very handy reference. *Paperback, 381 pages, line drawings.*

The New Answers Book 4

Ken Ham (editor)

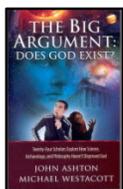

\$10.00

Well-informed authors provide answers to 30 questions of relevance to Christians. Some are related to origins, some not. Among the topics, this book looks at genetically modified organisms, irreducible design, environmentalism, the attitudes of the 16th century reformers of the faith, the existence of mountains in the pre-flood world and other issues. Highly recommended. *Paperback, 410 pages, black and white line drawings.*

The Big Argument: Does God Exist?

John Ashton and Michael Westacott \$15.00

Today, some of the world's best minds -- in a variety of disciplines -- grapple with whether there is any real purpose to our lives. Yet not only do many scientists believe in the God who created us with purpose, they also understand that what we do in the here and now has consequences in the next life. In this volume scientists discuss everything from archaeology to cosmology, philosophy and the human body. *Paperback, 403 pages.*

The Big Three: Major Events that Changed History Forever

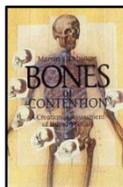

Henry M. Morris III \$10.00

The author sets out to establish how Christians can establish the authority of the never-changing Word of God over the ever-changing words of man. Basing his discussion largely on Scripture itself, he describes the deficiencies in the various attempts to accommodate Scripture to science. An important book for people who want to know why beliefs have consequences. *Paperback, 222 pages.*

Bones of Contention

Marvin Lubenow \$16.00

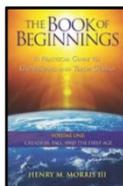

A thoroughly researched discussion of so-called ape man fossils. Follow the history of these fossil finds and evolutionary claims. The last chapter examines various attempts to dovetail ape men with the Biblical account. This book is a valuable resource.

Paperback, 295 pages.

Book of Beginnings - Volume 1

Henry M. Morris III \$10.00

A Practical Guide to Understand and Teach Genesis (Volume one: Creation, Fall and the First Age)

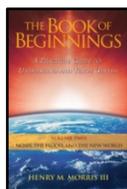

We have all heard people who confidently tell us that one Hebrew word or another from Genesis indicates how we can ignore the details in the early chapters. However in this book, Dr. Morris addresses these issues in a way that will not only give you confidence in your study of the Scriptures, but will also enable you to communicate the richness of Genesis to those around you. *Paperback, 233 pages.*

Book of Beginnings - Volume 2

Henry M. Morris III \$10.00

A Practical Guide to Understand and Teach Genesis (Volume Two: Noah, The Flood, and the New World)

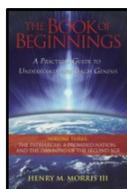

Dr. Morris explores the pre-Flood world, Noah's preparations for the coming cataclysm, the tremendous destruction wreaked by the deluge, and the restarting of human history up through the time of Abraham. Drawing from scientific data, archaeological evidence, secular histories, and a thorough knowledge of Scripture, Dr. Morris clearly demonstrates that Genesis can only be understood as God's inerrant record of real human history. *Paperback, 219 pages.*

Book of Beginnings - Volume 3

Henry M. Morris III \$10.00

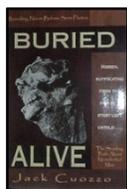

A Practical Guide to Understand and Teach Genesis (Volume Three: The Patriarchs, A Promised Nation, and the Dawning of the Second Age)

Genesis has become, for some, the forgotten book. Many pastors and teachers avoid it for fear of controversy. The result is that growing numbers of Christians are ignorant of God's revelation about our beginnings. In his Book of Beginnings trilogy, Dr. Henry Morris III addresses the tough issues of the Genesis record in a straightforward, comprehensible manner, clearly demonstrating that Genesis can only be understood as God's inerrant record of real human history. *Paperback, 262 pages.*

Buried Alive

Jack Cuozzo \$17.00

Original research on real fossils using high tech equipment reveals amazing insights concerning the Neanderthal people. The author blends an account of the dangers involved in this research and the technical details concerning the fossils, into a highly readable work. *Hardcover, 347 pages, black & white photos.*

By Design

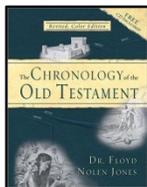

Jonathan Sarfati \$16.00

A great discussion on the significance of design, from the wonders of some marvelous creatures, to intricate biochemical systems, and the issues connected to predators and disease. Recommended for interested adults and all who enjoy fascinating details of the creation. *Hardcover, 260 pages, black and white illustrations.*

Chronology of the Old Testament

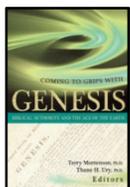

Floyd Nolen Jones \$25.00

This semi-technical book discusses the sequence of events from the creation to New Testament times. The author shows that the Scriptural account is accurate and reliable. It includes a CD and many pages of charts, graphs and diagrams. This book is also compatible with James Ussher's "Annals of the World". *Hardcover, 300 pages.*

Coming to Grips With Genesis

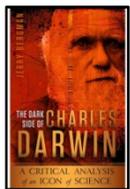

Terry Mortenson and Thane H. Ury (Editors) \$15.00

This is a scholarly volume which provides a welcome defence of a straightforward reading of the early chapters of Genesis. This volume is particularly interesting as it demonstrates how the concept of long ages affects our understanding of the whole Bible. Written for academics and seminary students, but of interest to people like you and me. *Paperback, 486 pages.*

The Dark Side of Charles Darwin

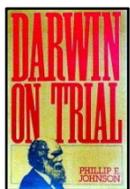

Jerry Bergman \$12.00

Learn more about the man who plotted to "murder God" by changing the dominant, and biblical, worldview of the time. Look beyond the public facade to the deeply troubling man within. *Paperback, 256 pages, black and white.*

Darwin on Trial

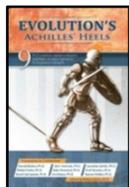

Phillip E. Johnson \$20.00

A forceful discussion of the supposed mechanism of evolution. This book caused the scientific establishment to sit up and take notice -- and besides -- it's interesting. *Paperback, 195 pages.*

Evolution's Achilles' Heels

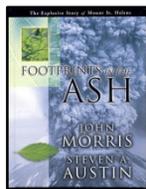

Robert Carter (editor) \$10.00

Few discussions at this level are as attractively presented as in this new book. Nine scientists discuss fatal flaws in evolutionary explanations. They make technical material user friendly and interesting! The topics include population genetics, DNA and molecular machines, origin of life, the fossil record, the geological record, radiometric dating, cosmology and lastly ethical issues such as social Darwinism. Recommended for readers who have an interest in up to date information (somewhat technical) on issues concerning origins. Ideal reference for students heading to post secondary studies. *Paperback, 272 pages, full colour.*

Footprints in the Ash

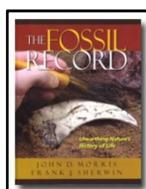

John Morris and Steven Austin \$18.00

At last we have a book on Mount St. Helens and what a book! The text follows the events and aftermath of May 18, 1980. Considerable attention is given to how this eruption demonstrates, on a small scale, rapid and dramatic changes to the earth's surface. Comparisons are made with flood geology. Deluxe colour photos amplify the interesting discussion. *Hardcover, 128 pages, full colour.*

The Fossil Record:

John D. Morris and Frank J. Sherwin \$14.00
Unearthing Nature's History of Life

In this new title, aimed at high school readers, we find a nicely illustrated, but not overwhelmingly technical discussion of fossils. Don't let yourself be overwhelmed by evolutionary arguments! This introduction is fun to read with interesting insights on issues like the supposed evolution of whales, origin of animals with backbones, and animals which walk on four feet. *Hardcover, 189 pages, full colour.*

Frozen Record

Michael Oard \$18.00

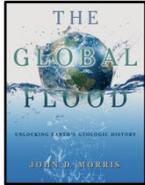

Readers interested in the ice sheets of Greenland and Antarctica need look no further than this comprehensive user friendly discussion of technical information. What are the implications for the creation model of earth history? The answers are clear and interesting. *Paperback, 199 pages.*

Gifted Mind: The Raymond Damadian Story

Jeff Kinley \$16.00
The fascinating story of how medical research specialist Dr. Raymond Damadian came to invent the MRI and how he sees the hand of God in all of this. We also learn why this famous man is passionate about creation science. *Hardcover, 192 pages, full colour.*

The Global Flood:

John D. Morris \$15.00
Unlocking Earth's Geologic History

The Global Flood presents the evidence in a way that clearly demonstrates why the biblical account of the Flood matters to all who want to understand and communicate the truth with confidence. *Hardcover, 175 pages, full colour.*

Grand Canyon: A Different View

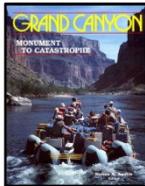

Tom Vail (editor) \$18.00

A bestseller at the Grand Canyon, and the target of considerable anti-creation sentiment, this book really does provide a different view. The deluxe colour photos include scenes of rocks and views not normally seen. The brief notes and commentary provided by various well known young earth geologists and scientists is simultaneously inspiring and informative. *Hardcover, 104 pages, full colour.*

Grand Canyon: Monument to Catastrophe

Steven A. Austin (editor) \$20.00

The rocks of the southwestern United States suggest that some very interesting events took place there. Fourteen scientists contribute to this examination of the evidence. The discussion is scholarly and extensively documented. In addition, the events that formed the canyon are interpreted in the historical framework of Scripture. *Paperback, 284 pages, colour photos; line drawings.*

The Greatest Hoax on Earth?

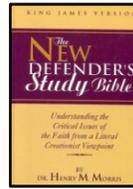

Jonathan Sarfati \$10.00

The author considers the arguments of arch-atheist Richard Dawkins and he shows that Biblical creation makes more sense of the issues than does Dawkins' materialism. *Paperback, 336 pages, line drawings.*

The Henry Morris Study Bible (King James Version)

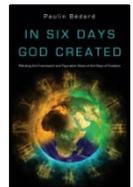

Dr. Henry M. Morris (editor) \$40.00

Brand new updated edition! Notes provide cross references and information on historical and scientific details of the text as well as well as the traditional interpretation. A very valuable resource, and a marked contrast to the modernistic notes provided in many other study Bibles. Includes index to major topics in annotations, many other useful appendices and concordance and full colour maps. Excellent gift for special occasions. *Hardcover, 1620 pages.*

In Six Days God Created:

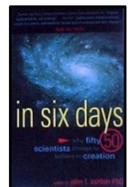

Paulin Bedard \$15.00

This book refutes the framework interpretation and other figurative views of the days of creation and shows the majestic progression of God's work of creation in six literal days. The author enters into debate with renowned contemporary theologians and seeks to give exegetical and theological guidance to modern students, pastors and church leaders amidst the present attraction of non literal interpretations of Genesis 1 and 2. *Paperback, 252 pages.*

In Six Days, Why Scientists Choose to Believe in Creation

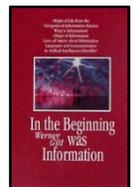

John F. Ashton \$12.00

Fifty scientists, representing a wide range of disciplines, explain why they support a literal six-day model of origins. Written for high school and adult readers. *Paperback, 360 pages.*

In the Beginning Was Information

Werner Gitt \$10.00

In this fascinating book, the author provides us with new appreciation for the Creation and for the Bible. The author probes what information is, where it comes from and what it accomplishes. Recommended for adults with an interest in science, mathematics and linguistics. *Paperback, 256 pages.*

Made in Heaven:

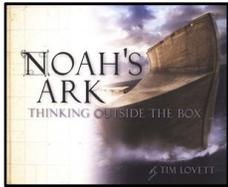

Ray Comfort and Jeffery Seto \$15.00
Man's Indiscriminate Stealing of God's Amazing Design

This book demonstrates that many of the technological advances to make our lives better, are based on nature. The authors discuss how even in the most advanced laboratories, scientists often begin their search for innovation by studying God's creations in the natural world. The discussion can be read at several levels from junior high to more technical adult. Richly illustrated. *Hardcover, 79 pages, full colour.*

Noah's Ark: Thinking Outside the Box

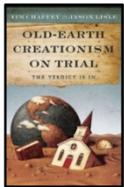

Tim Lovett \$12.00

The real ark, built by Noah, was based on God's commands which are recorded in Genesis. But story book and popular conceptions concerning the ark actually injure its credibility and are nothing like the Biblical description. This author built and tested many ark models and he demonstrates that the real ark, with Biblical dimensions and construction materials, was seaworthy and highly suitable for its task. An interesting examination of ancient ship building skills and God's word. Adults and fans of carpentry and boat design will enjoy this book. *Hardcover, 74 pages, full colour.*

Old Earth Creationism on Trial

Tim Chaffey & Jason Lisle \$10.00

This recently published argument for the young earth position, considers (in a scholarly and easily read discussion) the major old earth arguments. The authors support their argument with ample documentation and a logical format. Highly recommended for those who want to know why the age of the earth matters to Christians. *Paperback, 207 pages.*

One Race, One Blood

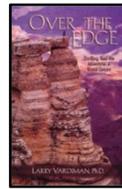

Ken Ham and A. Charles Ware \$12.00

The legacy of Darwin's speculations on evolution has led to terrible incidents of racism. This book examines the historical roots of racism and the Bible's response to it, the truth that God created only one race. *Paperback, 196 pages.*

Over the Edge

Larry Vardiman \$8.00

Based on his many adventures in conducting tours of the Grand Canyon, Dr. Vardiman shares with the reader evidence of catastrophe in the craggy cliffs, which points to God's past judgment of the world. The various adventures include snakes and other wildlife, all of which elicit reverence for God's work and His Word. *Paperback, 160 pages.*

Persuaded by the Evidence

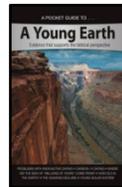

Doug Sharp and Jerry Bergman (editors) \$13.00

This book includes interesting personal accounts of the events which led 33 individuals to reject evolution theory and embrace the creation model and how this impacted their lives. Also the backgrounds of the founding fathers of the creation movement are included. *Paperback, 288 pages.*

Pocket Guide to a Young Earth

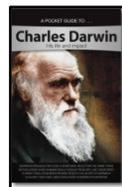

Answers in Genesis \$5.00

Authors, expert on these issues, provide interesting introductions to the topics. Illustrations enhance the text intended for ages 12 and up. *Paperback, 96 pages, black and white.*

Pocket Guide to Charles Darwin

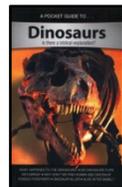

Answers in Genesis \$5.00

Authors, expert on these issues, provide interesting introductions to the topics. Illustrations enhance the text intended for ages 12 and up. *Paperback, 96 pages, black and white.*

Pocket Guide to Dinosaurs

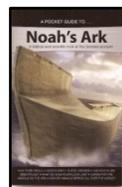

Answers in Genesis \$5.00

Authors, expert on these issues, provide interesting introductions to the topics. Illustrations enhance the text intended for ages 12 and up. *Paperback, 96 pages.*

Pocket Guide to Noah's Ark

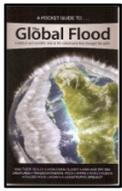

Answers in Genesis \$5.00

Authors, expert on these issues, provide interesting introductions to the topics. Illustrations enhance the text intended for ages 12 and up. *Paperback, 96 pages, black and white.*

Pocket Guide to the Global Flood

Answers in Genesis \$5.00

Authors, expert on these issues, provide interesting introductions to the topics. Illustrations enhance the text intended for ages 12 and up. *Paperback, 96 pages, black and white.*

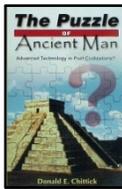

Pocket Guide to the Human Body

Answers in Genesis \$5.00

Authors, expert on these issues, provide interesting introductions to the topics. Illustrations enhance the text intended for ages 12 and up. *Paperback, 96 pages.*

Puzzle of Ancient Man

Donald E. Chittick \$10.00

The author discusses numerous manmade Out of Place Artifacts (OOP Arts) in the context of the Bible and secular accounts of ancient history. He develops the theme that the fate of past societies provides a message for us today. *Paperback, 123*

pages, colour photos.

Refuting Compromise

Jonathan Sarfati \$17.00

The author has produced a comprehensive Biblically based refutation of progressive creation. Among the topics he addresses are the origin of death and disease, the nature of Noah's flood, pre-Adamic human ancestors and the length of creation days.

Paperback, 411 pages.

Science and Human Origins

Ann Gauger, Douglas Axe, Casey Luskin \$15.00

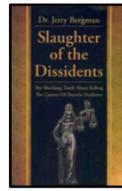

These highly qualified authors demonstrate from the latest scientific literature that similarity in fossil anatomy, and DNA sequences does not prove evolutionary descent of humans from chimps. What is more, mutation rates leading to new

information (if they occur at all) are far, far too slow to ever bring about such a transition. Interesting and well documented. Suitable for readers able to handle a somewhat technical discussion. *Paperback, 120 pages.*

Slaughter of the Dissidents

Jerry Bergman \$15.00

In the land of the "brave. and the free" some academics have suffered damage to their careers because of their Christian faith. Others, who merely expressed doubts about Darwinism, suffered because colleagues suspected they might have a religious agenda. An informed public is the first line of defense against these situations. *Paperback, 448 pages.*

Stargazer's Guide to the Night Sky

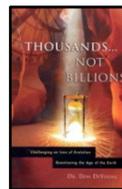

Jason Lisle \$32.00

Among the wonders of creation, we can all enjoy the night sky, and with more information we can appreciate it even more. This deluxe book, full of maps, and beautiful pictures, assists and instructs even beginners. And there are no references to millions or billions of years, which is certainly a bonus when discussing galaxies and quasars! *Hardcover, 240 pages, full colour.*

Thousands Not Billions

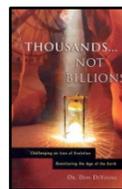

Donald B. DeYoung \$14.00

Bring yourself up to date on the exciting results of the latest research on radiometric dating. Discussions on this topic need not be reserved only for scientists themselves. This non-technical discussion of the RATE project is written with the interested adult in mind. *Paperback, 200 pages.*

Thousands Not Billions - Study Guide

\$8.00

This user friendly guide makes the details of radiometric dating understandable to high school and adult readers. Features chapter objectives, outline and overview, implications, and some experiments. *Paperback, 64 pages.*

Tour Guide: Royal Tyrrell Museum (Fifth Edition)

Margaret Helder

\$6.00

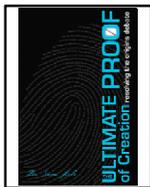

Enjoy the Royal Tyrrell Museum in Drumheller, Alberta with the help of the Creation Science Association's alternative tour guide. The museum has rearranged their displays so we have to update our guide to make your tour through the museum as easy as possible. The new edition is published in the same handy format as previous editions, for ease of holding and reading as you proceed from exhibit to exhibit. (For shipping add only \$2.00 if this is the only title ordered). *Paperback, 54 pages, black and white.*

The Ultimate Proof of Creation

Jason Lisle

\$10.00

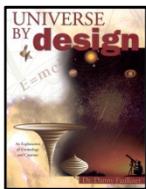

Readers will enjoy the insights on how to analyze and defend themselves against arguments for evolution. With practice on examples provided, they will feel a lot more confident in discussions with others. *Paperback, 254 pages.*

Universe By Design

Danny Faulkner

\$15.00

Cosmology is a discipline which searches for explanations about the history of the universe. In this book, the author demonstrates that the universe was created with purpose and reason. He considers the Big Bang scenario but demonstrates that this explanation has serious shortcomings. This book with questions, answers and index, was written for high school level and adults. *Paperback, 142 pages, black & white illustrations.*

Unveiling The Kings of Israel

David Down

\$25.00

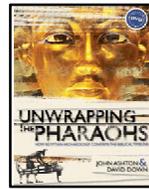

The author guides the reader from Ur to the land of the Pharaohs and to the New Testament. Rich illustrations accompany discussions of the archaeological significance of related discoveries. A fascinating resource for anyone interested in Biblical archaeology and its place in history. *Hardcover, 176 pages, full colour.*

Unwrapping the Pharaohs

John Ashton and David Down

\$30.00

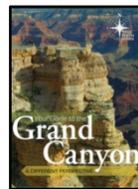

There is no doubt that the artifacts of ancient Egypt exert a certain fascination on most people. However the standard interpretation of Egyptian history is difficult to fit into a Biblical context. The authors, in the tradition of other conservative scholars, argue persuasively that the standard Egyptian chronology needs to be shortened. This book, richly accompanied by beautiful photographs, demonstrates how Egyptian and Biblical history are in close agreement. Highly recommended. *Hardcover, 221 pages, full colour.*

Your Guide to the Grand Canyon

Tom Vail, Michael Oard, Dennis Bokovoy, John Hergenrather

\$15.00

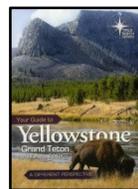

This is a spectacular guide to the Grand Canyon! This full colour, hardcover with coil booklet describes viewing options, at the canyon, what kinds of evidence to look for, fold-out photographs of the scene from view point after view point (with major features identified). All this is put into context with discussions about canyon geology, age, fossils, ecology, and recent history. Even if you can't actually go, you can still appreciate this wonderful landscape and understand its significance. *Hardcover, 190 pages, full colour.*

Your Guide to Yellowstone and Grand Teton

Tom Vail, Michael Oard et al.

\$15.00

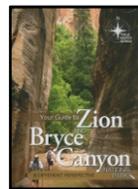

This guide, filled with beautiful full colour photographs, is perfect for anyone who wants to enjoy the parks in person or even in the comfort of their homes. Christian commentary highlights discussion on the significance of these natural wonders. This guide provides travel tips, maps, and descriptions of the natural features of the area. *Hardcover, 188 pages, full colour.*

Your Guide to Zion and Bryce Canyon

Tom Vail, Michael Oard et al.

\$15.00

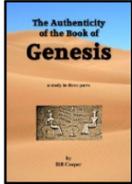

Here is your all-in-one guide to these two dynamic parks, filled with all you need to make your visit truly unforgettable! This unique, full-color guide unveils God's powerful hand in the grandeur of the vertical walls of Zion, the colorful hoodoos of Bryce Canyon, and all the diversity of life found in these stunning displays of creation. *Paperback, 190 pages, full colour.*

Technical Books

Authenticity of the Book of Genesis

Bill Cooper

\$25.00

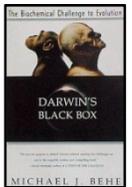

This well-known author of *After the Flood*, now turns his attention to the many legends from cultures around the world, which are similar to the accounts in the Book of Genesis. These similarities are indicative of a common source (but they are corrupted compared to Genesis). Anyway the similarities confirm the Biblical account of the dispersal from Babel. *Paperback, 423 pages.*

Darwin's Black Box

Michael Behe

\$20.00

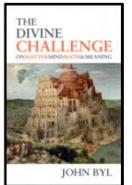

The author, a biochemist from a large secular university, startled fellow scientists with the publication of this book. Dr. Behe, while not a creationist, convincingly shows that a Darwinian explanation for the mechanisms of life will never be found. This book contains devastating evidence against evolution. The discussion is moderately technical. *Paperback, 307 pages, line drawings.*

The Divine Challenge

John Byl

\$15.00

The concepts of math are either eternal truths in the mind of God or ideas manufactured by man. The author examines the philosophical foundations of math and physics from a Biblical perspective contrasted with a secular perspective. The divine challenge to mankind is to explain everything without recourse to the supernatural. *Paperback, 317 pages.*

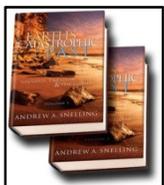

Earth's Catastrophic Past: Geology, Creation and the Flood

Andrew Snelling

\$45.00

Two volumes included in this set.

A must have resource for up to date information connected with the Flood of Noah.

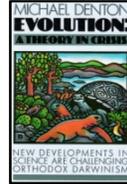

Scriptural interpretation, details of Hebrew text, plus a comprehensive collection of scientific information on fossils, age dating, moving continents and much more. Excellent for adults, schools, post secondary institutions and church libraries. *Hardcover, 1102 pages, full colour.*

Evolution a Theory in Crisis

Michael Denton

\$18.00

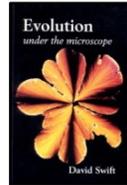

This is the foundational book which encouraged many people who initially were happy with secular science, to instead query popular interpretations of scientific data. The intelligent design approach to science was the direct result. Technical but very interesting. *Paperback, 368 pages, line drawings.*

Evolution: Under the Microscope

David Swift

\$26.00

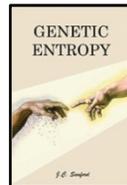

A Scientific Critique of the Theory of Evolution. Skeptical in outlook, the author never meant to challenge evolution, yet he could not help reflecting on the implications of molecular biology. The theme is that large biological molecules are astonishingly improbable. Indeed the criterion for folding of a protein molecule is, by itself, he says, enough to defeat any attempt at developing a protein through random processes. Based on such conclusions, the author also discusses how natural selection operates, origin of life speculations, endosymbiosis theory, origin of sex, cladistics, homology and the fossil record. The writing style is clear and interesting. Ideal for university students and scientifically literate adults who seek a current introduction to devastating problems with evolution. *Paperback, 423 pages.*

Genetic Entropy

John Sanford

\$14.00

The author considers the implications of what we now know concerning the rate of mutations within the genetic inheritance of people. The direction of change within the population does not look good for evolutionary hopes and expectations. *Paperback, 272 pages.*

God and Cosmos

John Byl

\$23.00

For a scientific and Christian review of current cosmological theories, you need look no farther. Thoroughly documented and clearly written. *Paperback, 243 pages.*

Starlight and Time

Russell Humphreys

\$9.00

The Bible teaches that the universe is just thousands of years old, and yet we can see stars that appear to be billions of light years away. In this book, the author explains this in terms of quantum theory. The book includes two technical papers presented at the Third International Conference on Creationism. *Paperback, 138 pages.*

DVDs

Astronomy Reveals Creation (DVD)

Jason Lisle

\$10.00

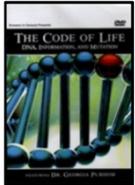

Many people use astronomy to challenge Scripture, but what do the heavens actually reveal? Dr. Jason Lisle explores five "secrets of the cosmos" to find out. Through his presentation, we see how the universe declares the glory of God and how the Bible is right when it talks about the basics of astronomy. It is also right when it speaks to the age of the universe, the uniqueness of Earth, and the issue of distant starlight. Dr. Lisle confirms that when we really understand the Bible and the universe, we find that the scientific evidence lines up with Scripture. *62 minutes.*

The Code of Life (DVD)

Answers in Genesis

\$10.00

DNA, Information, and Mutation

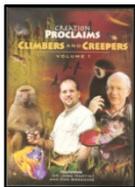

Explore the fascinating world of DNA and clearly see that "junk" DNA isn't junk and that mutations and natural selection are headed in the wrong direction, corrupting and decreasing information in DNA making evolution impossible. *45 minutes, featuring Dr. Georgia Purdom.*

Creation Proclaims: Climbers and Creepers (DVD)

Biblical Discipleship Ministries

\$15.00

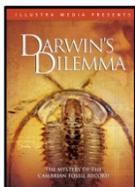

Learn how God makes Himself known through the creatures He has made. Enjoy seeing and learning about the world's greatest acrobat, the largest monkey, giants of the insect world, the rainbow of the sea and more. Great for the whole family! *50 minutes.*

Darwin's Dilemma: The Mystery of the Cambrian Fossil Record (DVD)

Illustra Media

\$18.00

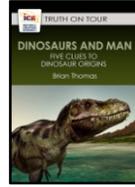

A feast for the eyes and the mind! Even although the discussion concerning sudden appearance of many-celled animals in the fossil record, is couched in terms which the evolutionists prefer (long ages), the arguments for evolution still fail spectacularly. Perfect for senior high school students and interested adults. *72 minutes.*

Dinosaurs and Man (DVD)

Brian Thomas

\$10.00

According to evolutionary history, dinosaurs evolved over eons of time and then mysteriously died out 65 million years ago. According to biblical history, dinosaurs were created in distinct kinds just thousands of years ago and were largely wiped out by a global flood. Which one is right? Using little-known but critical observations about dinosaurs gleaned from science, history, and Scripture, he presents solid answers to the biggest dinosaur questions, concluding that the fossil and historical evidence of dinosaurs defies evolution but fits what the Bible has to say about early Earth history. *59 minutes.*

Evolution's Achilles' Heels (DVD)

Creation Ministries International

\$15.00

Exceptionally well illustrated, with interesting commentary by 15 well qualified scientists, this DVD is guaranteed to fascinate and inform. Some of the eight topics will be more interesting than others to individual viewers, but this is not surprising when the topics cover everything from biology to geology to physics and astronomy. There is plenty of Christian commentary which highlights the significance of each issue. Younger viewers (for example high school) won't understand everything, but it will serve as an introduction to the issues. Subtitles in 16 languages can be selected. *96 minutes.*

Explore Glacier National Park (DVD)

\$10.00

Discover a place of majestic mountains, alpine lakes, meadows, and remnants of once-massive glaciers and snowfields. Travel to Montana to explore the amazing sites and geology at Glacier National Park. Noah Justice researches evidence for this area being created and eroded by the effects of the Flood. *30 minutes.*

Explore Rocky Mountain National Park (DVD)

\$10.00

Rocky Mountain National Park includes spectacular mountains, diverse wildlife, and lush forests. Go on an expedition with Noah Justice to explore how the Rocky Mountains were formed and eroded by the catastrophic tectonics of the Flood. *30 minutes.*

Explore the Grand Canyon with Noah Justice (DVD)

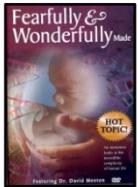

\$15.00

Join 14-year old Noah Justice as he explores 40 layers of the Grand Canyon while sharing details about how earth science actually supports the Biblical record. *30 minutes.*

Fearfully & Wonderfully Made (DVD)

Answers in Genesis \$12.00

An anatomist looks at the amazingly intricate details of development in the womb. Each stage includes a series of miracles which cannot be explained by random process or chance. This discussion is framed in terms of Psalm 139:13-16 and John 3. *63 minutes, featuring Dr. David Menton.*

Flight (DVD)

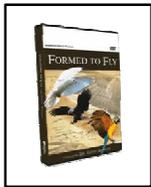

Illustra Media \$15.00

This DVD demonstrates not only the wonderful design of birds in general, but also the richness and variety that we find among these creatures. Filmed on three continents, and featuring dramatic scenes of birds in flight, and interesting discussion, this is certain to appeal to all. *62 minutes.*

Formed to Fly (DVD)

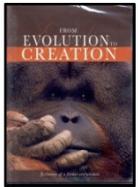

Answers in Genesis \$10.00

Unlike the dinosaurs, from which birds are said to have evolved, birds are truly "formed to fly." With scanning electron microscope Dr. Menton shows how different bird feathers are compared to reptile scales. There is no way the scales could have evolved by chance into feathers. *61 minutes, featuring Dr. David Menton.*

From Evolution to Creation (DVD)

Answers in Genesis \$10.00

In this powerful testimony, Dr. Gary Parker, a respected biology professor explains his gradual conversion from dogmatic belief in evolution to Biblical creation. Warm, humble and humorous, Dr. Gary Parker shows how, step by step, the Lord helped him to see the false assumptions behind modern evolutionary belief, and how the Bible's account of origins is confirmed by science. *60 minutes.*

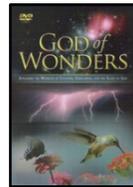

Geologic Evidences (DVD)

Answers in Genesis and ICR \$10.00

While observational science continues to baffle those who believe the immense Canyon took millions of years to form, Dr. Steven Austin shows how the facts point to rapid formation by catastrophic, rushing water. *57 minutes, featuring Dr. Steven Austin.*

God of Wonders (DVD)

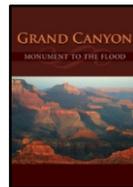

Eternal Productions \$15.00

This is a breathtaking tour of God's creation wonders, from the vastness of space to the intricate beauty of snow crystals, the complexity of DNA and the wonders of biology. Great for young and old alike! *85 minutes.*

Grand Canyon: Monument to the Flood (DVD)

Institute for Creation Research \$15.00

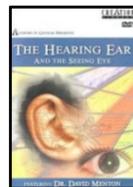

Your personal tour of Grand Canyon brought to you by the creation scientists who know it the best! Answer the hard questions about the origin and history of the Grand Canyon. Learn how this canyon is best understood in the light of Scripture.

55 minutes.

Hearing Ear and Seeing Eye (DVD)

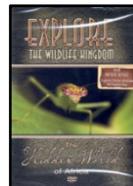

Answers in Genesis \$10.00

Anatomist Dr. David Menton escorts you on a journey into the marvelous intricacies of the human ear and eye, which both have clear stamp of the Creator. *65 minutes, featuring Dr. David Menton.*

The Hidden World of Africa (DVD)

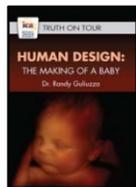

Exploration Films \$18.00

Interesting insects of the African plain, as well as some of the large animals from that area. *50 minutes.*

Human Design: The Making of a Baby (DVD)

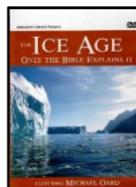

Dr. Randy Guliuzza \$10.00

Evolution holds that life descended from a common ancestor through small modifications over long periods of time. Actual living creatures, however, reveal something different. Dr. Randy Guliuzza explores the complexities of human reproduction to demonstrate that life couldn't possibly have evolved. He shows that biological systems are fully integrated. They have key parts that fit together for an intended purpose and break down when those parts are altered or removed. *65 minutes.*

Ice Age: Only the Bible Explains It (DVD)

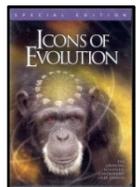

Answers in Genesis \$10.00

How many ice ages have there been in earth's history? When was the last one? How does an ice age start? How did the global flood of Noah's day contribute to the Ice Age? These and many other questions are addressed in this enlightening DVD. Meteorologist Michael Oard examines the physical evidence, scrutinizes the secular theories, and shows that only the Bible sufficiently explains the mechanism necessary to produce and sustain the Ice Age. *63 minutes, featuring Michael Oard.*

Icons of Evolution (DVD)

Cold Water Media \$15.00

This compelling video reviews scientific evidence, which certain school officials want to keep out of the classroom. Consider the discussion, observe the rich illustrations and make up your own mind. Includes Darwin's finches, fruit fly genetics, fossils, molecular machines and human origins. *60 minutes.*

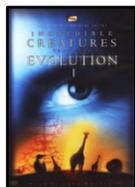

The Image of God (DVD)

Answers in Genesis \$10.00

Biologist, Dr. David DeWitt, discusses the unique nature of mankind. Critiquing the evolutionary tree that supposedly links humans to apes, he exposes the idea of such a tree for what it is, science fiction. *45 minutes, featuring Dr. David DeWitt.*

Incredible Creatures That Defy Evolution - 1 (DVD)

Exploration Films \$18.00

Powerful evidence that animal designs can only be attributed to the Creator. Young viewers age 8 and up will love this one! *50 minutes, with Dr. Job Martin.*

Incredible Creatures That Defy Evolution - 2 (DVD)

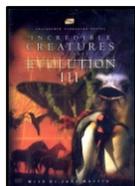

Exploration Films \$18.00

More wonderful examples of animal designs that can only be attributed to the Creator. Great for young viewers age 8 and up. *50 minutes, with Dr. Job Martin.*

Incredible Creatures That Defy Evolution - 3 (DVD)

Exploration Films \$18.00

The first two videos in this series were so successful that a new one has been released. Some say it is the best yet! *80 minutes, with Dr. Job Martin.*

Jurassic Ark Mystery (DVD)

Answers in Genesis \$10.00

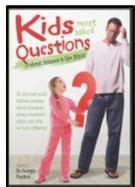

The Creation Adventure Team series

Explore a dinosaur museum and discover incredible answers to the amazing mystery of the giant lizards. It also includes a Spanish language track. *40 minutes.*

Kids' Most Asked Questions About Science and the Bible (DVD)

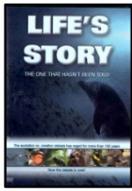

Answers in Genesis \$14.00

Dr. Georgia Purdom, who is a mother, discusses how parents can answer science related questions from their children. In every case, she says, start with Scripture. The topics she discusses here include how old the earth and universe are, aliens, dinosaurs, death and suffering, and how genetics affects what we are like. *47 minutes.*

Life's Story (DVD)

Exploration Films \$18.00

Exceptionally beautiful scenes from coral reefs and the African plain form the backdrop for discussion of evolution. Filmed and researched over five years in more than ten different countries, this video demonstrates the inadequacy of origin of life theories and proposed mechanisms of evolution. Recommended for upper elementary grades and up, in all types of school or other gatherings. *56 minutes.*

Life's Story 2: The Reason for the Journey (DVD)

Exploration Films \$18.00

This spectacular film, of rare and interesting animals from around the world, provides insight into the intricate designs in nature and our place in this wonderfully created world. The producers suggest that this film is suitable for ages 10 through adult. However, although younger children will not understand the commentary, the whole family will enjoy the close up encounters with unusual and wonderful wildlife. *100 minutes.*

Living Waters (DVD)

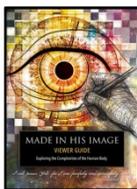

Illustra Media \$15.00

Another wonderful program on animals, which illustrates their beauty and amazing functions necessary for survival, this time in the sea. Here we discover highly complicated and unique design features in dolphins, Pacific salmon, sea turtles and humpback whales. In all this we see the work of their Creator! *68 minutes.*

Made in His Image (DVD)

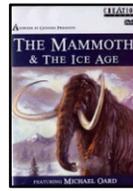

ICR Scientists \$40.00
Set of 4 DVDS

Each 22 minute disk has subtitles in English, Spanish, Chinese, Korean and Arabic. The set provides an inspiring look at the wonderful way that God has designed the human body. The topics include development of a baby in the womb; marvel of the eyes; uniquely human hands and beauty in motion. Recommended for all ages. *88 minutes.*

Mammoth & the Ice Age (DVD)

Answers in Genesis \$10.00

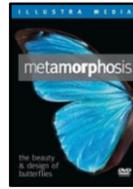

You will be captivated as meteorologist Michael Oard unravels the details of the ice age that followed the Biblical Flood. Not the least of these details is the story of the woolly mammoths of the north. *50 minutes.*

Metamorphosis (DVD)

Illustra Media \$15.00

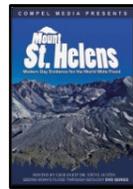

The Beauty and Design of Butterflies

From caterpillars to the amazing details of what happens in the chrysalis, to astonishing details of the Monarch butterflies' migration patterns, this DVD is certain to provide new insights, even to nature lovers. Spectacular insights into wonderful design. *64 minutes.*

Mount St. Helens (DVD)

Dr. Steven Austin \$18.00

Multimedia presentation of the Mount St. Helens eruption and its significance for the Biblical Flood. *36 minutes, With Steve Austin.*

The Privileged Planet (DVD)

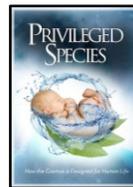

Illustra Media \$15.00

Imagine spectacular computer animated sequences of journeys through our solar system and deep space. Imagine compelling discussion of the unique nature of this planet and of our privileged position in the cosmos. With this video, it all becomes reality. High school and adult. (Also available in Chinese) *60 minutes.*

Privileged Species (DVD)

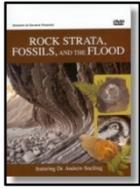

Discovery Institute \$15.00

This program provides a delightful overview of some features in nature which are essential for human life to exist and flourish. The discussion focuses on the special properties of carbon, water and oxygen without which there would be no life. Lastly we learn about ways in which the human body is wonderfully designed. Junior high viewers and older will love this visually attractive program. *33 minutes.*

Rock Strata, Fossils and the Flood (DVD)

Answers in Genesis \$12.00

Join geologist Dr. Andrew Snelling as he discusses six main evidences for the flood. His interesting examples take us all over the world. The discussion is enhanced by graphs and photographs. *47 minutes.*

Six Short Days, One Big Adventure (DVD)

\$10.00

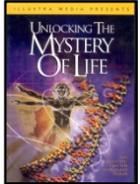

The Creation Adventure Team series

With the help of robot Proto, an energetic team of youngsters discovers the wonders of the six days of creation. *35 minutes.*

Unlocking The Mystery of Life (DVD)

Illustra Media \$15.00

A feast for the mind and the eyes, this video is a must have for almost everyone. Imagine spectacular computer animated sequences of tiny molecular machines inside the living cell. Imagine beautiful shots of the islands where Darwin's finches live. Imagine authoritative discussion about irreducible complexity. With this video it all become reality. (Also available in Chinese) *65 minutes.*
