

CREATION SCIENCE  
ASSOCIATION OF ALBERTA

PRESENTS

## Creation Weekend 2025

Friday October 24 – Saturday October 25

# *Challenges, Motivation and Hope*

Providence Canadian Reformed Church  
12905 122 Avenue NW Edmonton, AB

Featuring

**Dr. Brian Thomas**

Research Scientist, Institute for Creation Research, Dallas, Texas

### **Schedule – Oct 24 & 25**

Friday @ 7:00 p.m. Fresh Fossils from Four Continents (especially family friendly)

Saturday @ 10:00 a.m. The Beginning of Life (design features extraordinaire)

Saturday @ 11:30 a.m. – 12:15 p.m. Annual General Meeting

Saturday 12:15 p.m. – 1:15 p.m. Noon Break

Saturday @ 1:15 p.m. How Creatures Adapt (why Darwin's explanations don't work)

Saturday @ 2:30 p.m. Conference Round-up: Where to Now?

Saturday @ 3:00 p.m. Meet and Greet

Free Admission

## Dr. Brian Thomas

Research Scientist  
at Institute for Creation Research  
Dallas, Texas

In the early years of our existence, Creation Science Association of Alberta brought in many excellent speakers from the Institute for Creation Research. All were scientists with excellent experience and credentials. Now once again, CSAA is delighted that one of ICR's research scientists, Dr. Brian Thomas, has agreed to be our featured speaker for **Creation Weekend October 24 and 25, 2025**.

**Dr. Thomas is a particularly interesting choice for featured speaker.** Not only can he point to impressive recent research, published in a technical journal, but he has interests in a broad spectrum of other origins' based studies as well. In 2019 Dr. Thomas completed his doctoral research project from the University of Liverpool on the contents of dinosaur fossils. That study involved identification and measurements of original organic material in bone from an exceptionally well-preserved *Edmontosaurus* duckbill dinosaur from Montana. Recently, Dr. Thomas was one of seven authors to publish on this topic in the journal *Analytical Chemistry*.

To describe what all that research means, Dr. Thomas is scheduled to speak, in Edmonton, on this exciting topic **Fresh Fossils from Four Continents** on Friday evening (October 24).

Dr. Thomas has also participated in many other exciting projects. He draws on his broad familiarity with interesting origins issues in his presentations on Saturday. In the morning in **The Beginning of Life**, he demonstrates how amazing molecular machines are essential to the workings of a living cell, producing features that leave us awestruck.

Lastly Dr. Thomas turns his attention to the failure of Darwinism to explain anything about how creatures adapt in response to their environment and many people who do not necessarily like topics on natural selection and adaptability (supposed mechanisms for evolution), may love this family friendly discussion. The title of the presentation is **How Creatures Adapt**, scheduled for early Saturday afternoon.

Dr. Thomas has published on numerous topics including the apologetics book *Living in the Light of Genesis*. Be sure not to miss these insightful presentations from an exciting scientist.
