### Children's Books

#### Answers Book for Kids SERIES

Ken Ham

\$8.00 each

These colourful little books with easy to read format provides children 6 - 12 years old with answers to important questions that they may be asking. *Hardcover, 48 pages, full colour.*

Available in this Series

**Volume 1 – Creation and the Fall**

**Volume 2 – Dinosaurs and the Flood of Noah**

**Volume 3 – God and the Bible**

**Volume 4 – Sin, Salvation and the Christian Life**

**Volume 5 – Space and Astronomy**

**Volume 6 – Babel and the Ice Age**

**Volume 7 – Evolution and “Millions of Years”**

#### Bugs: Big and Small God Made Them All

Will Zinke

\$18.00

Unique design features of various intriguing and beautiful insects point to the work of God, the Creator. Amazing photography!

*Hardcover, 80 pages, full colour.*

#### Days 1 - 7

Russell Grigg

\$4.00

This magazine style booklet provides a guide to what God did on each day of the Creation Week. Fun and interesting for children aged 10-13.

*Paperback, 29 pages, full colour.*

#### Dinosaurs for Kids

Ken Ham

\$15.00

Within these pages kids will uncover the facts about dinosaur history from the Creation to recent discoveries. From where dinosaurs lived to what scientists assume they know about these great creatures, dinosaurs have never been this exciting, revealing and simply amazing!

*Hardcover, 64 pages, full colour.*

#### Dinosaurs of Eden

Ken Ham

\$15.00

This completely revised edition of a popular book for young children, features dinosaurs in the Garden of Eden and in the wider world prior to Noah's flood. Even in the post-flood world some dinosaurs no doubt survived and these are included in the text and illustrations.

*Hardcover, 64 pages, full colour.*

#### One Big Family

Gary and Francis Bates

\$10.00

The Bible's true account of history, that all people everywhere are closely related, and are made in the image of their Creator is one of the most heartwarming and affirming messages than any person can hear. This book tells the story of our true human origins and the first family—

Adam and Eve. *Hardcover, 47 pages, full colour.*

#### Science for Kids SERIES

ICR Authors

\$10.00 each

The younger set (ages kindergarten to grade five) really love information about science that is at their level. Fun illustrations and youthful descriptions of the issues are totally ideal for this audience! *Paperback, 111-121 pages, full colour.*

Available in this Series

**Animals by Design**

**Dinosaurs: God's Mysterious Creatures**

**Earth: Our Created Home**

**Space: God's Majestic Handiwork**

## Introductory Level Books (Teen – Adult)

### The Creation Answers Book

Don Batten et al.

\$15.00

This very readable and well documented book answers over 20 important questions that many people ask concerning Genesis. Who is God, techniques to date events, human relationships, questions concerning the flood, the ice age, fossils, and distant starlight in a young universe. Satisfying to read. *Paperback, 265 pages, black and white illustrations.*

### The Design and Complexity of the Cell

Jeffery P. Tomkins

\$15.00

Dr. Jeffrey Tomkins and his contributing colleagues document and help explain the intricate processes of cells, and give keen insight for (clearly seeing) the obvious hand of the Creator in the "things that are made" (Romans 1:20). *Hardcover, 129 pages, full colour.*

### Exploring SERIES

\$14.00 each

These are fascinating books for junior high readers. Thought provoking questions at the end of each chapter make these books wonderful for interactive learning. *Paperback, 140-163 pages, line drawings.*

Available in this Series

**Exploring Planet Earth** (John Tiner)

**Exploring The History of Medicine** (John Tiner)

**Exploring The World Around You** (Gary Parker)

**Exploring the World of Astronomy**

**Exploring The World of Biology** (John Tiner)

**Exploring The World of Chemistry** (John Tiner)

**Exploring The World of Mathematics** (John Tiner)

**Exploring The World of Physics** (John Tiner)

### Guide to... SERIES

Institute for Creation Research Scientists \$18.00 each

This excellent series of books are certain to change children who do not like "science" into eager learners. Beautifully illustrated with important information that has been laid out in an attractive way. *Hardcover, 115 - 122 pages, full colour.*

Available in this Series

**Guide to Creation Basics**

**Guide to Dinosaurs**

**Guide to God's Animals**

**Guide to the Human Body**

**Guide to the Universe**

### Taking Back Astronomy

Dr. Jason Lisle

\$18.00

The author shows that the popular idea of billions of years is unnecessary and that one need only look to the Creator to explain the origin of the universe. Filled with fascinating photographs and illustrations for easy comprehension. *Hardcover, 125 pages, full colour.*

### Wonders of Creation Series

\$16.00 each

This series answers important questions in exciting ways. These high-quality books have been developed for multi-level teaching with special colour coding for 3 skill levels. Filled with full-colour pictures and illustrations for the classroom, independent study or homeschool settings. *Hardcover, 80 – 96 pages, full colour.*

Available in this Series

**The Archaeology Book** (David Down)

**The Astronomy Book** (Jonathan Henry)

**The Ecology Book** (Tom Hennigan and Jean Lightner)

**The Fossil Book** (Gary and Mary Parker)

**The Geology Book** (John Morris)

**The Mineral Book** (David McQueen)

**The Ocean Book** (Frank Sherwin)

**The Weather Book** (Michael Oard)

*New!*

### Wonderful and Bizarre Life Forms in Creation

Jerry Bergman

\$22.00 each

*Paperback, 138 pages, full colour.*

This collection of amazing and bizarre forms of life illustrates the enormous variety in God's creation. The selection was difficult to make from over two million available choices, but included are some of the more popular animals, such as the panda and the koala. Covered are not only some background of lifeforms, but also the serious problems each of them presents for evolution, which in most cases are lethal for Darwin's theory.

## Intermediate Level Books (High School to Adult)

### The Big Argument: Does God Exist?

John Ashton and Michael Westacott \$15.00

Today, some of the world's best minds -- in a variety of disciplines -- grapple with whether there is any real purpose to our lives. Yet not only do many scientists believe in the God who created us with purpose, they also understand that what we do in the here and now has consequences in the next life. In this volume scientists discuss everything from archaeology to cosmology, philosophy and the human body. *Paperback, 403 pages.*

### By Design

Jonathan Sarfati \$16.00

A great discussion on the significance of design, from the wonders of some marvelous creatures, to intricate biochemical systems, and the issues connected to predators and disease. Recommended for interested adults and all who enjoy fascinating details of the creation. *Hardcover, 260 pages, black and white illustrations.*

### Coming to Grips With Genesis

Terry Mortenson and Thane H. Ury (Editors) \$15.00

This is a scholarly volume which provides a welcome defence of a straightforward reading of the early chapters of Genesis. This volume is particularly interesting as it demonstrates how the concept of long ages affects our understanding of the whole Bible. Written for academics and seminary students, but of interest to people like you and me. *Paperback, 486 pages.*

### The Dark Side of Charles Darwin

Jerry Bergman \$12.00

Learn more about the man who plotted to "murder God" by changing the dominant, and biblical, worldview of the time. Look beyond the public facade to the deeply troubling man within. *Paperback, 256 pages, black and white.*

### Creation Basics and Beyond

Henry Morris III et al \$15.00

An In-Depth Look at Science, Origins, and Evolution

Top-notch authors provide well-documented and clear discussion on many topics of concern to Christians. The first section focuses on worldview issues and the Bible, the second on created kinds, the third on flood geology, the fourth on dinosaurs and man, and the fifth on creation of the cosmos. Good reading and good insights!! *Paperback, 384 pages.*

### The Divine Challenge

John Byl \$15.00

The concepts of math are either eternal truths in the mind of God or ideas manufactured by man. The author examines the philosophical foundations of math and physics from a Biblical perspective contrasted with a secular perspective. The divine challenge to mankind is to explain everything without recourse to the supernatural. *Paperback, 317 pages.*

### Evolution's Achilles' Heels (Book)

Robert Carter (editor) \$15.00

Few discussions at this level are as attractively presented as in this new book. Nine scientists discuss fatal flaws in evolutionary explanations. They make technical material user friendly and interesting! The topics include population genetics, DNA and molecular machines, origin of life, the fossil record, the geological record, radiometric dating, cosmology and lastly ethical issues such as social Darwinism. Recommended for readers who have an interest in up to date information (somewhat technical) on issues concerning origins. Ideal reference for students heading to post secondary studies. *Paperback, 272 pages, full colour.*

## Evolution's Blunders, Frauds & Forgeries

Jerry Bergman

\$18.00

Are you looking for an entertaining and interesting book? Look no further! The author spent two decades compiling the research for this new book. It so happens that many so-called proofs of evolution in past generations turned out to be completely in error. Yet these so-called findings were the foundation upon which general acceptance of evolution was based. A skeptical attitude to these pronouncements would have avoided a lot of grief for science! This is a lesson for us today. *Paperback, 320 pages, black and white.*

## The Greatest Hoax on Earth?

Jonathan Sarfati

\$15.00

The author considers the arguments of arch-atheist Richard Dawkins and he shows that Biblical creation makes more sense of the issues than does Dawkins' materialism. *Paperback, 336 pages, line drawings.*

## How Darwinism Corrodes Morality

Jerry Bergman

\$22.00

The author demonstrates how certain passionate Darwinists managed to transform the values and customs of society from morals based on Judeo-Christian understanding to a rejection of standards of any kind. Clearly Darwinian views matter! Every pastor, seminary student, teacher and thinking adult needs to read this book. *Paperback, 312 pages, black and white illustrations.*

## How Should Christians Approach Origins

John Byl and Tom Goss

\$5.00

Has science disproven the plain reading of the Bible, particularly concerning origins? This booklet explores the nature of science and the influence of definitions of this discipline. It shows how basic Christian doctrines are grounded in the historicity of Biblical events. It defends the traditional, plain sense reading of Genesis. (For shipping of this title only, add \$2.00). *Paperback, 42 pages.*

## Inspiration from Creation:

### How Engineers are Copying God's Designs

Stuart Burgess and Dominic Statham

\$12.00

Contrary to the evolutionary view that predicts sloppy design in nature, engineers are finding amazing natural solutions for many of our technological problems. With a resume that includes designing machines for industry, medicine and space exploration, Drs. Burgess and Statham share some interesting insights into the design process. *Paperback, 129 pages full colour.*

## In the Beginning Was Information

Werner Gitt

\$10.00

In this fascinating book, the author provides us with new appreciation for the Creation and for the Bible. The author probes what information is, where it comes from and what it accomplishes. Recommended for adults with an interest in science, mathematics and linguistics. *Paperback, 256 pages.*

## Keeping Faith in an Age of Reason: Refuting Alleged Bible Contradictions

Jason Lisle

\$18.00

A favourite tactic of Bible critics is to claim that there are errors and contradictions in Scripture. Dr. Lisle of Institute for Creation Research provides answers for 420 such claims. He also indicates the kind of fallacy each critical attack involves. A very handy reference!! *Paperback, 254 pages.*

## No Christian Silence on Science

Margaret Helder

\$14.00

This is a "how to" book, how to evaluate scientific pronouncements and so called facts and how to avoid being overwhelmed by secular or theistic evolutionary arguments. The book's objective is to show that science, when critically evaluated, does not threaten a biblical understanding of how we came to be here. *Paperback, 116 pages, black and white illustrations.*

## No Christian Silence on Science Companion Study Guide

Margaret Helder

\$5.00

A user-friendly guide explaining the significance of each chapter, key concepts questions with detailed answers, resources (many available online) and extension project suggestions. *Booklet, 36 pages.*

## Persuaded by the Evidence

Doug Sharp and Jerry Bergman (editors) \$14.00

This book includes interesting personal accounts of the events which led 33 individuals to reject evolution theory and embrace the creation model and how this impacted their lives. Also the backgrounds of the founding fathers of the creation movement are included. *Paperback, 288 pages.*

## Pocket Guide Series

Answers in Genesis \$6.00 each

Authors, expert on these issues, provide interesting introductions to the topics. Illustrations enhance the text intended for ages 12 and up.

*Paperback, 96 pages, black and white.*

Available in this Series

**Pocket Guide to A Young Earth**

**Pocket Guide to Charles Darwin**

**Pocket Guide to Dinosaurs**

**Pocket Guide to Global Warming**

**Pocket Guide to Noah's Ark**

**Pocket Guide to the Global Flood**

**Pocket Guide to the Human Body**

## Glass House:

### Shattering the Myth of Evolution

Ken Ham and Bodie Hodge (eds) \$14.00

Experts, like Drs. David Menton, Nathaniel Jeanson and Georgia Purdom, expose flaws in popular evolutionary arguments including the horse sequence, human chromosome 2, whale fossils, dinosaur-to-bird-arguments and more.

Cutting edge layman level discussion recommended for teens to adults. Brand new title! *Paperback, 350 pages.*

## Thousands Not Billions

Donald B. DeYoung \$14.00

Bring yourself up to date on the exciting results of the latest research on radiometric dating. Discussions on this topic need not be reserved only for scientists themselves. This non-technical discussion of the RATE project is written

with the interested adult in mind. *Paperback, 200 pages.*

## Replacing Darwin: The New Origin of Species

Nathaniel T. Jeanson \$25.00

What Darwin knew about biology was so meager compared to what we know today. Dr. Nathaniel Jeanson, recently graduated from Harvard in cell biology, demonstrates that Darwin did not know enough to provide a platform for our understanding of nature. The author discusses how there are abundant data that best fit ideas of created kinds and recent creation rather than gradual evolution. A really interesting discussion of what 'survival of the fittest' does and does not accomplish. *Hardcover, 335 pages, colour as well as black and white.*

## The Ultimate Proof of Creation

Jason Lisle \$14.00

Readers will enjoy the insights on how to analyze and defend themselves against arguments for evolution. With practice on examples provided, they will feel a lot more confident in discussions with others. *Paperback, 254 pages*

## Genetic Entropy

John Sanford \$20.00

Genetic Entropy presents compelling scientific evidence that the genomes of all living creatures are slowly degenerating - due to the accumulation of slightly harmful mutations. The author considers the implications of what we now know concerning the rate of mutations within the genetic inheritance of people. The direction of change within the population does not look good for evolutionary hopes and expectations.

## DVDs

### Evolution's Achilles' Heels (DVD)

Creation Ministries International \$18.00

Exceptionally well illustrated, with interesting commentary by 15 well qualified scientists, this DVD is guaranteed to fascinate and inform. Some of the eight topics will be more interesting than others to individual viewers, but this is not surprising when the topics cover everything from biology to geology to physics and astronomy. There is plenty of Christian commentary which highlights the significance of each issue. Younger viewers (for example high school) won't understand everything, but it will serve as an introduction to the issues. Subtitles in 16 languages can be selected. *96 minutes.*

### Inspiration from Creation: How Engineers are Copying God's Designs (DVD)

Stuart Burgess and Dominic Statham \$10.00

Contrary to the evolutionary view that predicts sloppy design in nature, engineers are finding amazing natural solutions for many of our technological problems. With a resume that includes designing machines for industry, medicine and space exploration, Drs. Burgess and Statham share some interesting insights into the design process. *65 minutes*

### Flight (DVD)

Illustra Media \$15.00

This DVD demonstrates not only the wonderful design of birds in general, but also the richness and variety that we find among these creatures. Filmed on three continents, and featuring dramatic scenes of birds in flight, and interesting discussion, this is certain to appeal to all. *62 minutes.*

### God of Wonders (DVD)

Eternal Productions \$15.00

This is a breathtaking tour of God's creation wonders, from the vastness of space to the intricate beauty of snow crystals, the complexity of DNA and the wonders of biology. Great for young and old alike! *85 minutes.*

### Metamorphosis

Illustra Media \$18.00

The Beauty and Design of Butterflies From caterpillars to the amazing details of what happens in the chrysalis, to astonishing details of the Monarch butterflies' migration patterns, this DVD is certain to provide new insights, even to nature lovers. Spectacular insights into wonderful design. *64 minutes*

### Origin: Unlocking the Mystery of Life (DVD)

Illustra Media \$18.00

With spectacular computer animation and cutting-edge research, Origin examines a question that has baffled science for centuries: how did life on Earth begin? Today, most researchers insist it arose through simple chemistry that - without direction or plan - transformed non-living matter into the first living cell. Origin exposes the flaws of materialistic theories and points clearly to intelligence and mind. *47 minutes.*

### Your Origins Matter (DVD)

Jason Lisle \$12.00

What we believe about origins has consequences. In this presentation Jason Lisle discusses the importance, truth and relevance of Genesis. *61 minutes.*
